

The act of the Legislature creating a State Board of Assessors and Equalization is dreaded by the people of Nevada, though it is probable that this year at least their fears will prove groundless. While the act authorizes the Board to modify the assessment of an individual or county and empowers it to assess all railroads within the State, utterly ignoring in that respect County Assessors and County Boards of Equalization, it is not likely that the State Board will revolutionize the old order of things and permit prejudice or partiality to govern its actions.

The members of the Board are aware of the popular prejudice against the act. This prejudice, the *Journal* is assured by reliable persons, was shared by the Governor at the time of its passage, though for some reason he did not veto it. Under such circumstances it is but reasonable to suppose that no flagrant outrage will be perpetrated in increasing the assessment of individuals and reducing the assessment of railroads.

The most objectionable feature of the act is that it places it in the power of three persons—a majority of the Board—from whose decision there is no appeal, to fix the valuation for taxable purposes of a large proportion of the assessable property of the State.—*Journal*.

Results are already beginning to appear from the Postal Subsidy bill. The Inman Steamship Company have been induced by it to undertake the construction of two new greyhounds, equal to the very finest vessels afloat. They will be built in this country and will fly the American flag. The estimated cost is \$4,000,000 for the two, each to be 10,200 tons register. These millions of dollars will, therefore, be spent to give employment to American labor, and to circulate among American tradesmen, instead of going abroad. Even a little protection to shipping works very well.

The *Transcript* has the following: "At least one Nevada Indian has risen to success, and that by a most remarkable route. In 1881 he was sentenced to the penitentiary for life for killing a Chinaman, and was set to work in the quarries. The other day the Governor pardoned him, and now he fills the place of boss blaster at wages of \$3.50 and board. There is no moral to the story, for if the man hadn't committed the murder he would be to-day as he was at the time of the crime, a dirty, vicious, aimless loafer."

At Shields, England the other day, a little midget girl only 37 inches high was married to Professor Hadley, 6 feet 1 inch high. Humbert the man without arms, gave the bride away, signing the certificates by holding the pen between his teeth. The bridesmaid was Miss Nina, the American giantess who weighs 616 pounds; best man was Captain Dallas, who is 7 feet 10 inches in height. General Metillon, 29 inches high, was one of the wedding party. All were connected with a traveling circus.

Only three public schools in Chicago are allowed to inflict corporal punishment. Unruly boys are sent from the quieter schools to the punishment schools for proper discipline and, properly reformed, are returned to their classes. This plan has a fine deterrent effect, and commends itself to other cities. When rebellious boys see discipline in sight they incline to wholesome thinking.

M. T. Hall, president of the Missouri Farmers' Alliance, is, according to a published interview utterly opposed to the third party convention which is to be held at Cincinnati in May.
